

LANDOWNER INFORMATION

Version 5/17/22

Idaho Forest Group is committed to the Sustainable Forestry Initiative® (SFI®) 2022 Fiber Sourcing Standard, and supports the program's intent of responsible forest management.

IFG encourages all landowners to use qualified logging contractors and resource professionals when managing their timberlands. We also encourage landowners to follow their state's Best Management Practices, reforest the land after harvest, protect endangered species and their habitats, maintain the visual quality of the timberlands, control the spread of invasive species, and comply with all state, federal, and local laws. In addition, we recommend participation in forest management certification and conservation programs, such as the American Tree Farm System.

For guidance on implementing sustainable forestry practices, please review the links below or ask for assistance from one of our staff Foresters.
